
TECH NOTE

INCREASE YOUR HORSEPOWER

Cylinder Port Flowing

Increase your engine's performance up to 17 percent. Allow the fuel to flow through your heads smoother and faster which will increase your horsepower and engine performance. Better take offs. Smoother running engines.

This simple process can be done with little down time or during your annual inspection. Cylinder port flowing has been performed on race engines for more than a decade because they know every bit helps. How about you?
